

Tips for completing Life Story Work:

Empathetic
communicate sensitive information with the understanding, that for the child, hearing details of their case history could be stressful and upsetting.

Collaborative
the child is an active participant in the process of collecting information and encouraged to ask questions.

Flexible
the work is directed by the needs and wishes of the child.

Think digital
seek methods to capture life stories using the many digital tools available

Interactive
ensure the process is engaging to ensure participation.

Individual
a unique and personalised project designed especially for the child.

Inclusive
encourage & facilitate the participation of important people to the child.
